### CASH IN DRAWER DECLARATION

In the system option 1 programming, cash-in-drawer declaration can be programmed compulsory. Cash-in-drawer declaration is performed by adding the total of each type of media in the drawer, and pressing the "**SUBTOTAL**" key. Depression of the "**SUBTOTAL**" key with numeric will enter the information that the cash-in-drawer declaration performed, and reports in X position and Z position will be allowed.

In this case, the difference of input amount and cash in drawer is displayed.

After this declaration, you can not take any registering operation, if not reporting in X mode or Z mode.
